SPEEDISHUTTLE EXPANDING PRESENCE IN HAWAII

(August 27, 2013) – Hawaii's locally owned and largest airport shuttle service provider is expanding its business statewide. With 420 employees, SpeediShuttle is hiring more airport greeters and growing its fleet of Mercedes Benz shuttles and chauffeured driven cars to further improve the quality of their service at airports on Maui, Oahu, Kauai and the Big Island.

Company officials say the move to expand its receptive services will result in significantly improved visitor arrival experiences. For example, on Maui, SpeediShuttle has recently stationed additional airport greeters throughout the facility to assist passengers in the arriving terminals. Having greeters welcome visitors and returning residents and get them on their way quickly will be a boon for the thousands of monthly customers holding reservations for SpeediShuttle's Maui airport shuttle and chauffeured black car service.

"As a resident of Maui who frequently flies into Kahului Airport, I'm always impressed by the warm ALOHA and personal greetings our staff provide our wonderful visitors soon after disembarking the plane," said President & CEO Cecil S. Morton. "That personal touch is what sets Hawai'i apart from the rest of the world."

Company officials say that with the new changes in Maui, SpeediShuttle is now free to greet guests at the gates and baggage areas before their luggage arrives, eliminating the uncertainty of securing a seat, long lines and wait times associated with having the previous 'on demand' shuttle service concession contract with the Department Of Transportation. SpeediShuttle recommends customers reserve their airport transfer service with SpeediShuttle, in advance of their arrival to eliminate any concern about reserving a seat and wait times when they are ready to leave the airport.

"We are thrilled to partner with so many great companies here in Hawaii," said Lee Collins, vice president of sales and marketing for SpeediShuttle. "We look forward to continuing our legacy of exceptional customer service, and working in tandem with our industry partners to provide the very best experience for all visitors to our beautiful state."

About SpeediShuttle

SpeediShuttle began operations in 1999 on Maui and has since grown to become the leading provider of ground transportation shuttle services in the state, maintaining the largest fleet of Mercedes Benz passenger vehicles in all of North America. SpeediShuttle's offices are located near the international airports and harbors, with shuttles and private sedans that service all hotels and resorts across the islands.
